Java
Python

C
C++
Ruby

PROFESSIONAL EXPERIENCE

LVIS

Senior Frontend Engineer | Mar '22 - Current

- Spearheaded the migration to Vue.js 3, enhancing the application's reactivity system and performance, leading to a 20% decrease in load times.
- Developed a refactoring plan for the frontend team that resulted in increasing the maintainability of our project and saving 500+ FTE hours a year.
- Architected robust state management solutions using Vuex, streamlining data handling and enabling efficient cross-component communication.
- Helped grow our frontend team by formulating interview questions, interviewing and evaluating candidates.

CINNAMON MOBILE

QA Engineer | Jan '16 - Mar '18

- Utilized annotation tooling and video capturing to streamline team communication.
- Evaluated product usability by providing extensive and timely feedback on design reviews.

PULSE42

Full Stack Software Engineer | June '21 - Jan '22

- Composed reusable component library with React hooks to simplify complex components.
- Developing UI component for data visualization with ChartJS and MUI.
- Reviewed designs docs to catch common pitfalls and edge cases for more robust designs.
- Presenting updated front-end designs for final sign-off.

MAFIOSO

iOS Engineer | June '17 - Mar '18

- Personal project that I developed to have a better experience playing werewolf with my friends.
- Designed and implemented the UI and the UX flow of the app.
- Using firebase for implementing the realtime database, authentication and the back-end app.

EDUCATION

SAN FRANCISCO STATE UNIVERSITY

Computer Science B.S. (GPA: 3.7)

Aug 2019 - May 2021
